PROFESSIONAL SUMMARY

Results-driven Data Scientist & Business Analyst with 6+ years of experience across FMCG, manufacturing, pharmaceutical, and business operations environments. Proven track record of transforming complex datasets into actionable business insights through dashboard automation, predictive forecasting, and executive reporting. Expert in Power BI, SQL, Python, Excel, and SAP ERP, with demonstrated success improving reporting accuracy by 30%, sales tracking efficiency by 40%, and reducing manual reporting workload by 50%. Currently expanding expertise in machine learning, Generative AI, cloud analytics, and AI-driven analytics projects.

KEY ACHIEVEMENTS

- Improved sales tracking efficiency by 40%, forecasting accuracy by 20%, and reduced manual reporting workload by 50% through Power BI automation, predictive analytics, and data optimization.
- Contributed to a 15% revenue increase and improved reporting accuracy by 30% through competitor analysis, pricing optimization, and data validation initiatives.
- Analyzed operational and sales data across 5+ regions using Power BI, SQL, Excel, and SAP — improving reporting turnaround by 40% and reducing invoicing errors by 25%.
- Developed AI-powered forecasting prototypes, the HARMONY HRMIS analytics platform, and 10+ KPI dashboards while analyzing 50+ datasets for SMEs and development-focused projects.
- Supported executive decision-making through analytics reporting, stakeholder presentations, and cross-functional business performance insights.

PROFESSIONAL EXPERIENCE

Freelance Data Scientist

Independent Consultant

Feb 2025 – Present

Kenya & Remote

- Designed and implemented 10+ KPI dashboards and reporting trackers using Power BI and Excel, improving reporting efficiency by 40%.
- Developed the HARMONY HRMIS prototype supporting workforce reporting, process automation, and fraud detection monitoring.
- Built AI-powered forecasting prototypes, including crop price prediction models during the Afri-Hack AI Challenge, improving forecasting accuracy by 20%.
- Enhanced workflow efficiency by 35% through automated reporting structures and analytics workflows.
- Exploring Generative AI and analytics automation solutions to streamline business intelligence processes.

Data Analyst

Mini Group of Companies – Minibakeries (N) Ltd

Jan 2021 – Jan 2025

Nairobi, Kenya

- Automated Power BI dashboards and SQL reporting workflows, improving sales tracking efficiency by 40%.
- Built predictive forecasting models in Python, increasing forecast accuracy by 20% for operational planning.
- Reduced manual reporting by 50% through automation, data cleansing, and process optimization.
- Conducted competitor and KPI analysis, contributing to a 15% revenue increase through pricing optimization.
- Improved reporting accuracy, data quality, and management decision-making through advanced analytics and executive reporting.

Sales Administrative Supervisor

Mini Group of Companies – Minibakeries (N) Ltd

Jan 2020 – Dec 2020

Nairobi, Kenya

- Analyzed sales, distribution, and lost-sales data across 5+ regions, reducing reporting turnaround by 40% through automated Power BI and Excel dashboards.
- Led journey anomaly and SKU-level analysis, improving delivery efficiency and cutting partial invoicing errors by 25%.
- Coordinated with Regional Sales Managers (RSMs) and optimized order fulfilment workflows using SAP ERP.
- Improved reporting accuracy and cut error rates by 30% via a data integrity initiative; streamlined data collection, raising efficiency by 25%.

Personal Assistant to Commercial Director

Universal Corporation Ltd

Oct 2015 – Apr 2019

Nairobi, Kenya

- Provided comprehensive executive support including calendar management, correspondence, and meeting coordination for the Commercial Director and Managing Director.
- Prepared executive reports, board papers, and presentations supporting strategic decision-making at senior levels.
- Assisted with marketing projects including campaign dashboards, product launch trackers, and competitor benchmarking.
- Collaborated with sales and marketing teams to analyze customer acquisition and retention trends.

SKILLS & COMPETENCIES

Technical: Data Analysis, Dashboard Development, KPI Reporting, Predictive Analytics, Forecasting, Data Visualization, Statistical Analysis, Reporting Automation, Data Modeling, Business Intelligence, CRM & ERP Reporting

Tools & Platforms: Power BI, Excel (Advanced), SQL, Python (Pandas, Seaborn, Plotly), SAP ERP, MySQL, PostgreSQL, MS Office Suite

AI / ML: Regression, Classification, Predictive Modeling, Generative AI (exploring), Machine Learning Foundations

Methods & Frameworks: CRISP-DM, Statistical Modeling, Forecasting, Data Cleansing, Process Automation

Domains: FMCG, Manufacturing, Pharmaceuticals, HR Analytics, Agriculture, Business Operations

Soft Skills: Analytical Thinking, Problem Solving, Stakeholder Management, Communication, Leadership, Strategic Thinking, Report Writing, Attention to Detail

NOTABLE PROJECTS

Credit Risk Prediction (2026)

Built an end-to-end machine learning model using Python and Scikit-learn to predict loan default risk, and deployed it as an interactive Streamlit application.

Diabetes Case Study (2025)

Analyzed diabetes data and developed predictive models using Python and machine learning to identify key risk factors and support data-driven healthcare insights.

HARMONY HRMIS Prototype (2025, Nairobi)

HR analytics platform for workforce reporting, fraud detection, and automation — enhancing HR visibility and optimizing processes to boost operational efficiency.

AI Forecasting & SDG Analytics Projects (2025, Nairobi)

Led CRISP-DM projects addressing food insecurity, poverty, healthcare, crop pricing, and sustainability, applying AI and predictive modeling to real-world development challenges.

Fuel Efficiency Analysis (2025, Nairobi)

Analyzed fuel consumption and emissions data to uncover actionable patterns supporting both environmental sustainability and operational performance.

EDUCATION

Bachelor of Science in Information Technology

*Jomo Kenyatta University of Agriculture and Technology (JKUAT),
Nairobi*

2009 – 2014

Diploma in Information Technology

Tracom College, Nairobi

2006 – 2007
